2. Each bet on the ticket must have minimum odds of 1.50, if there is any game less than odds of 1.50 on the ticket, the ticket will not be eligible for CUT ONE.

- How Cash Out works

Cash Out allows you to collect part of the winnings on your bet before all the events you are betting on have finished. The amount you receive is determined at the time of cashing and will depend on the current probability of winning the bet, so it may be greater or less than the initial stake.

Cash Out is subject to live betting markets which can be volatile during a sporting event, especially in the late stages. As the odds change, the Cash Out will either increase, decrease or be completely removed.

- Cash Out example

A ticket with three events where you bet 100 on Team1 winning.

Assuming the odds are 2.00, 3.10 and 1.50 and the potential payout is 930 if all odds are successful.

Five minutes from the end, the three matches have a result of 1:0; at this time the Cash Out value could be 750 so you could decide to Cash Out and collect the current value.

- Cash Out Terms and Conditions

Cash Out are available for single and multiple bets. System/Integral bets cannot be cashed out.

Cash Out are not available if the odds of an event are suspended.

During Cash Out request, any price changes, suspension of markets, and any other system errors that are detected may cause the cash out to be rejected.

If the Cash Out request is successful, this will be displayed and the bet will be settled shortly.

The actual final result of the related market will have no impact on the Cash Out amount.

The Cash Out amount offered at any time is the total amount that will be returned to your account if successful.

Where we have reason to believe that a Cash Out is carried out after the outcome of an event is known, the company reserves the right to void the original bet that was Cashed Out.
